

```
--- djangoapi\examples\buildings\deleteBuilding.py ---
```

```
from djangoapi.buildings.models import Buildings
filterById = Buildings.objects.filter(id=1)
```

```
#all the results are querysets:
```

```
https://docs.djangoproject.com/en/5.1/ref/models/querysets/
```

```
#to access to the results you can convert the queryset to a list
```

```
l=list(filterById)
```

```
print(l)
```

```
p=l[0]
```

```
print(p.id)
```

```
print(p.area)
```

```
print(p.geom)
```

```
p.delete()
```
